PRICELIST No. 37

Without German Added Value Tax

11-2016

PLANETARIUM NV 110/220

(Schoolplanetarium, Order-No. 2000000)

Celestial globe 50cm in diameter, of near black though transparent acrylic glass; incl. motorized tellurion (solar system) mounted in the southern ecliptic pole; by removing the sun-cap, a point light bulb enables the projection of stars and constellations (shadow-projection). Incl. manual, base with operation amplifeyer, transformer and 60 illustrations of the constellations printed on plastic foils, suitable for projection.

Please order your A.C. voltage.

€ 1.660,50

SOLAR PROJECTION LENS

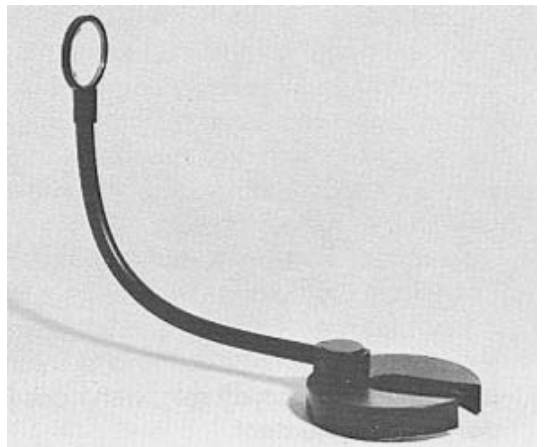

(Order-No. 2000010)

A small optical lens on a flexible arm, projects the annual position of the sun onto the surface of the globe or onto the surrounding walls of the room or projection

cupola. Thus the geocentric solar position along the ecliptic plane can directly be checked and solar culmination heights for summer and winter can be measured.

€ 97,50

(presently long delivery time)

PROJECTION CUPOLA

(for Use with above Planetarium, Order No. 2000100)

Projection dome of 2.5 m in diameter; geometrically exact semisphere, consisting of 8 equal segments and one additional circular top segment and one additional circular top segment; material: fiberglass reinforced resin; interior surface in high reflecting white; outer surface in grey; self-supporting; to be installed in a darkable room complete incl. all fasteners, wires and screws.

Weight: 45 kg gross, incl. heavy cardboard box

€ 3.450,--

Same cupola of 3,5 m diameter (Order-No. 2000110)

currently not available

Heavy projection cupola of 4m oder 6m diameter

Upon Request

(the prices are without German VAT and do not include shipment- and packing costs)
